LIMITATIONS OF CLASSICOT

TAILORING TO UNREGISTERED SPACES: APPROACH 1

▶ A.K.A *"the map and match approach"*

▶ Estimate global transformation jointly with OT coupling

► E.g. [Rangrajan et al '96; Zhang et al '17; Grave et al '18; AM+Jaakkola '18]

► Non-convex / alternating optimization \Rightarrow requires careful initialization/
relaxation

▶ (Often) limited to orthogonal transforms, same dimensionality

TAILORING OT TO UNREGISTERED SPACES: APPROACH 1

- ▶ A.K.A *"the map and match approach"*
- ▶ Estimate global transformation jointly with OT coupling
- ▶ E.g. [Rangarajan et al '96; Zhang et al '17; Grave et al '18; AM+Jaakkola '18]
- ▶ Non-convex / alternating optimization => requires careful initialization/relaxation
- ▶ (Often) limited to orthogonal transformations, same dimensionality
